

Borneo
Orangutan
Survival USA

Our mission

Established in 1991, the Borneo Orangutan Survival (BOS) Foundation is the world's largest orangutan conservation organisation. Through our global partnerships we are changing the downward trajectory for Bornean orangutans and their depleting rainforests.

Our mission is two-fold. First, we rescue orangutans in immediate danger, followed by an extensive rehabilitation program, and finally re-introduction into protected rainforests or onto forested sanctuary islands.

Our impact (figures from 2023)

MORE THAN
1.1M ACRES UNDER
OUR CARE

To ensure the long-term survival of orangutans, and other rainforest species, we must protect and restore the Bornean rainforest.

OVER
500 ORANGUTANS
RETURNED TO
THE WILD

The orangutans are closely monitored for the first few months following their return to the wild.

The only way for us to save the Bornean orangutan and their rainforest homes is to create a global movement for change.
